

# Sack Room Dust Collectors

## Filtration Engineered for Performance

The Sack Room dust collector from Cammach is designed to maximise dust collection and the life of collector components for years of extended service.

A self-contained collector with everything needed to begin collecting dust, the Sack Room Dust Collector comes complete with fan and fan motor, automatic shaker and shaker motor, and system controller making installation quick and easy. Since the automatic shaker cleans the filter bags, there is no need for expensive compressed air. Ideal for intermittent operations in plant processes, the Sack Room Dust Collector can be used as a central system or at the point of dust generation

## Proven Performance

### Sack Room Dust Collector Compact Design

Minimises floor space and fits in virtually any plant layout.

### Versatility

Three configurations to suit a variety of dust collection applications.

### Broad Range

Offering maximum air handling capacity in a compact design, the Sack Room Dust Collector offers filtration media area from 40 to 750 square feet.

### Quiet & efficient operation

Motors and fans are enclosed in a collector housing to minimise noise.

### Easy maintenance 10 year warranty
